**Part. III DETAILED ACTION**

1. Claims 4-9, 12-23 and 27-29 are pending.
2. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1644, Patrick Nolan.
3. Applicant's election with traverse of Group III in Paper No. 6 is acknowledged. The traversal is on the ground(s) that it would not be an undue burden to search the other groups. This is not found persuasive because for reasons set forth in Paper No. 5.  
The requirement is still deemed proper and is therefore made FINAL.
4. Upon further consideration of the restriction requirement, the following species election is required.

**SPECIES**

5. This application contains claims directed to the following patentably distinct species of the claimed invention.

The following species election is required.

A) A method of treating a reproductive in an organism selected from

- I) birds
- ii) fish
- iii) reptile
- iv) amphibian
- v) insect
- vi) arachnid
- vii) oocyte producing parasite
- viii) rabbit

with a zona pellucida protein

Each organism has unique physical, chemical and biological properties, which gives each species unique enablement and search requirements. The species are therefore patentably distinct from one another.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for which prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 4, 12, 13, 14, 15, 16, 17, 18, 19,

21, 23, 27, 28 are generic.

7. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

10. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor or at least one claim remaining in the application. Any amendment of the inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (h).

12. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Nolan whose telephone number is (703) 305-1987. The examiner can normally be reached on Tuesday through Friday from 9:00 am to 5:30 pm.
